

# How The Interlock Device Works

## It Tests for Alcohol

- ☑ If the device registers over the preset limit the car will not start.
- ☑ Retests must be performed during the drive preventing a driver from having someone else start the car.
- ☑ The device needs to be calibrated every other month.

## Monitech Interlock Installation

Having a Monitech Interlock device installed is simple and easy. The ignition interlock will be installed in your vehicle while you wait. Usually it takes about 2 hours but actual time may vary by vehicle type.

Before we begin installation you will practice and take several tests to make sure you understand how to use the device. While the device is being installed you will review additional training materials. The technician will review the information with you and answer any questions you may have.

## FREE INTERLOCK INSTALLATION

Discount offer valid only when calling the number below.

Installation Date & Time:

Installation Location:

**CALL
